

Title	Page
Adaptive Gait Characteristics of Individuals With Chronic Ankle Instability During Barefoot And Shod Walking.	119
An investigation on the static and dynamic balance in patients with knee osteoarthritis before and after a specific training program.	35
Assessment of balance in normal subjects and in patients with diabetic neuropathy receiving a training program.	145
Assessment of physical therapists' performance in General Organization of Teaching Hospitals and Institutes.	205
Assessment of Proprioception in Pre-operative and Postoperative Carpal Tunnel Syndrome Patients Following Different Physical Therapy Programs.	159
Balance in subjects with and without scoliosis implication for physical therapy treatment.	40
Bone Mineral Density Response to Whole Body Vibration Versus Resistive Training in Postmenopausal Women.	183
Changes in gait characteristics during normal cadence in elderly.	151
Clinical, Electrophysiological and Kinesiological Study of Foot-Knee-Hip Interaction in Stroke Patients.	130
Cognition and Standing Balance Interaction in Children with Idiopathic Epilepsy.	172
Comparison between different aerobic exercise training intensities on outcomes of cardiac rehabilitation programs in patients with ischemic heart diseases.	44
Comparison between Effects of Strengthening Exercises to Calf Muscle with or without Elastic Compression Stocking in the Treatment of Varicose Vein.	122
Correlation between brachial blood flow and electrocardiogram measures after body weight control in males with high coronary artery risk.	94
Correlation between respiratory muscles strength and quality of life after pulmonary rehabilitation program in COPD.	152
Decision making for spasticity management in diplegic children.	203
Dynamic Postural Control: Treadmill Training with Partial Weight Bearing in Hemiparetic Cerebral Palsied Children.	135
Effect external high frequency oscillation on some cardiopulmonary parameters after major upper abdominal surgeries.	68

Title	Page
Effect of a comprehensive treatment program in improving gait parameters and energy expenditure in patients with unilateral hip osteoarthritis.	79
Effect of aerobic exercise on chronic non-cirrhotic active hepatitis c (HCV).	141
Effect of Anal Electrical stimulation on Pressure-time Curve of the Pelvic Floor Muscles in Post Traumatic Faecal Incontinence.	106
Effect of angle-specific isometric strengthening exercises on quadriceps muscles in total knee replacement's patient.	39
Effect of augmented feed - back on changing visual - perceptual and fine - motor skills in diplegic cerebral - palsied children.	34
Effect of cognitive rehabilitation on hand functions in spastic hemiplegic children.	111
Effect of cross- education program on certain perceptual motor activity in spastic hemiparetic children.	20
Effect of different heel heights of foot wear on gait parameters of normal pregnant women.	98
Effect of exercises on osteoporotic postmenopausal women.	82
Effect Of Exercises On Postural Changes During Pregnancy.	155
Effect of exposure to fifty hertz low intensity magnetic field on the lymphoid tissues of rats.	87
Effect of Flexible and Semi rigid Lumbosacral Supports on the Loads of the Lumbar Spine at Different Trunk Positions.	91
Effect of Hyperbaric Oxygen Therapy on Gross Motor Development in Severely Spastic Children.	209
Effect of inspiratory muscles training on functional capacity in patients with chronic heart failure.	121
Effect of Isokinetic Training on Muscle Torque and Dynamic Balance in Burned Patients.	127
Effect Of Laser Therapy On Electrophysiological Parameters In Children With Peripheral Facial Palsy.	136
Effect of locomotion therapy on gait pattern in spastic hemiparetic children.	54
Effect of low level laser irradiation on phrenic nerve palsy after open-heart surgery.	95
Effect of mechanical vestibular stimulation on back geometry and spinal mobility in spastic diplegic children.	134
Effect of modified aerobic exercise program and personality on plasma Leptin level in abdominal obese subjects.	176

Title	Page
Effect of plyometric training on shoulder proprioception in athletic subjects.	175
Effect of proprioception training on functional instability of the ankle using a modified balance board.	100
Effect of Pulse Configuration of Induced Current on Sciatic Nerve Regeneration.	72
Effect of Selected Physical Therapy Program on Bone Mineral Density in Myelomeningocele.	168
Effect of vibratory stimulation on crouch gait spastic diplegic children.	33
Effect of Visual Versus Auditory Myofeedback on Gait Pattern of Hemiparetic Children.	170
Effect of visuomotor coordination training on fine motor skills in spastic hemiplegic cerebral palsy children.	133
Effect of whole body vibration on walking pattern of postmenopausal osteopenic women.	188
Effectiveness of Electromyographic Biofeedback in Improving Quadriceps Strength and Voluntary Activation after Total Knee Arthroplasty.	161
Effects of aerobic exercises and micro current on immune parameters following neck lymph nodes dissection.	165
Effects of Different Inclinations of Laterally Wedged Insoles on Gait Mechanics in Patients with Medial Knee Osteoarthritis.	181
Effects of Partial Body Weight Support on Dynamic Balance and Distance of Walking in Chronic Low Back Pain.	157
Efficacy of Aerobic and Deep Breathing Exercises on Pulmonary Function and Functional Capacity in Burned Male Patients.	105
Efficacy of Betamethasone Dipropionate phonophoresis in the Treatment of Atopic dermatitis.	195
Efficacy of Different Therapeutic Modalities on Altering Pressure and Skin Blood Perfusion in Diabetic Neuropathic Foot.	140
Efficacy of Dual-Task Balance Training in Stroke Patients with Balance Impairments.	200
Efficacy of Dynamic Postural Stability on Modulation of Motor Neuron Excitability in Hemiparetic Cerebral Palsied Children.	167
Efficacy of laser acupuncture versus exercise program on elderly's immune system.	5

Title	Page
Efficacy of Lidocaine Iontophoresis for Topical Anesthesia before Dermatological Procedures.	196
Efficacy of Light – Emitting Diode Therapy on Diabetic Foot Ulcers.	164
Efficacy of Low Frequency Current in the Treatment of Female Stress Urinary Incontinence.	154
Efficacy Of Magnetic Field and Proprioception Training in the Treatment of Knee Osteoarthritis.	116
Efficacy of Ozone Therapy on Chronic Arm Lymphedema Following Radiotherapy for Breast Cancer.	198
Efficacy of Pelvic-Floor Muscles Re-Education Program in Post-Micturition Dribble and Premature Ejaculation Control in Patients with Erectile Dysfunction.	192
Efficacy of Pulsed Direct Current Versus Continuous Direct Current in Tap Water Iontophoresis in Treating Palmar Hyperhidrosis.	163
Efficacy of Pulsed Magnetic Field on Bone Density in Juvenile Rheumatoid Arthritis.	208
Efficacy of relaxation technique as a prophylactic method in controlling preeclampsia.	47
Efficacy of Transcutaneous Electrical Nerve Stimulation and Selective Exercises Program after Groin Hernia Repair on Male Patients.	128
Efficacy of transcutaneous electrical nerve Stimulation versus pulsed electromagnetic Field therapy on chronic prostatitis/Chronic pelvic pain syndrome.	193
Efficacy of Ultrasound Versus High Voltage Current on Healing rate of Leg Venous Ulcers.	197
Efficiency of Selected Physical Therapy Programme in the Prevention and Treatment of Osteoporosis.	75
Electrical stimulation as a new rehabilitation tool for patients with chronic obstructive pulmonary disease.	148
Electromyographic analysis of the knee extensor muscle during standing up and sitting down on chair in knee osteoarthritis.	49
Electromyographic Study of Selected Muscles Controlling Pelvic Stability in Stroke Patients During Gait.	108
Electrophysiological responses to neuromuscular stimulation in post burn tarsal tunnel syndrome.	194

Title	Page
EMG biofeedback versus interferential electrical stimulation in genuine stress incontinence.	27
Energy Expenditure in Normal Subjects of Different Body Height and Individuals with Lateral Ankle Instability.	90
Evaluation of feet pressure and balance in patients with unilateral palantar fasciitis.	84
Exercise capacity and ventilatory function response to ergometer training in asthmatic children.	184
Exercise versus low level laser on oxidative balance in mild hypertension.	25
Functional outcome of pulsed magnetic stimulation in spastic paraplegic patients.	201
Gait and balance deviations following unilateral hip arthroplasty.	143
Hand rehabilitation with tendon transfer surgery and with botulinum toxin injection in hemiplegic children: Similarities and differences.	112
Hazards during exposure to low and high electromagnetic fields.	21
Helium neon versus gallium aluminum arsenide laser irradiation on burn wound healing in rats.	12
Hip kinetic and kinematic analysis during unaided and aided gait after total hip arthroplasty.	125
Hyperbaric oxygen therapy versus Cognitive training on hand function in hemiparetic cerebral palsied children.	207
Influence of Abdominal Muscles Exercises on the Function of the Pelvic Floor Muscles in Mild Stress Urinary Incontinence.	97
Influence of Cognitive Training on Kinematics of the Upper Limb in Spastic Hemiplegic Children.	204
Influence of Designed Resonance Electromagnetic Impulses on Skeletal Muscles Regeneration.	73
Influence of different physical modalities on obese females.	149
Influence of different therapeutic modalities on dynamic balance in elderly.	93
Influence of exercises on levodopa bioavailability in parkinsonian patients.	15
Influence of Extension Traction on Lumbar Configuration and Muscle Activity.	115
Influence of long exposure to electromagnetic field on immune system and elucidation of the issue of infantile health impact.	18

Title	Page
Influence of Low Level Laser Therapy on Delayed Muscle Soreness after Eccentric Exercise and Neuromuscular Electrical Stimulation.	179
Influence of Partial Body Weight Suspension on Gait Efficiency for Stroke Patients.	109
Influence of school bag carriage on gait and posture.	178
Influence of Sudden Unexpected Loads on Trunk Muscles Response in Normal Individuals and Low Back Pain Patients.	80
Influence of Treadmill Exercise on Intraocular Pressure in Patients with Type 2 Diabetes.	186
Investigation into technique for improving posture of adolescent girls with thoracic hypnosis.	19
Kinetic chain exercises in restoration of knee dynamic stability after anterior cruciate ligament reconstruction.	10
Left ventricular parameters changes in obese hypertensives after body weight reduction.	150
Leg strengthening exercise versus aerobic training in rehabilitation of chronic heart failure patients.	24
Low intensity laser therapy in osteoarthritis.	51
Low intensity laser therapy versus cardiac rehabilitation program for ischemic heart disease patients.	4
Mechanical Compensations of Lower Extremity Following Anterior Cruciate Ligament Reconstruction Using Autogenic Hamstring Muscle Graft.	144
Metabolic Syndrome Response to Walking Training and Low Carbohydrate Diet in Elderly.	185
Modified physical therapy program versus surgical approach in management of spondylolisthetic patients.	28
Motor relearning of gluteus maximums and gluteus mediums muscles: its effect on standing balance in stroke patients.	66
Myocardial perfusion imaging and functional assessment for the efficacy of rehabilitation program post myocardial infarction.	43
Myofascial Trigger Points Pressure Release Versus Exercises Therapy in the Treatment of Chronic Cervical Myofascial Pain Dysfunction Syndrome.	158
Neuromuscular scoliosis modulation via myofeedback training in spastic children.	169
Normative Isokinetic Values of Knee Muscles Performance in Healthy School-Age Children.	171

Title	Page
Outcomes pulmonary rehabilitation on pulmonary functions after spinal surgical correction of adolescent scoliosis.	23
Ozone Therapy Versus Low Intensity Laser Therapy Effect on Angiopathy in Diabetic Foot Ulcer.	147
Physical examination Vs. ultrasonography in the evaluation of the lateral ligament injury of the ankle.	29
Physical Therapy Profile for Lower Limb Amputees.	160
Plantar pressure distribution with different body weights in normal subjects.	77
Postural control training: effect on balance and locomotion in hemiparetic children.	70
Predicton of mechanical patellofemoral dysfunction as a result of muscle endurance insufficiency in patients suffering from anterior knee pain.	30
Proprioceptive training in the rehabilitation of cerebral palsied children.	69
Reciprocal electrical stimulation in spasticity control of hemiparetic cerebral palsied children.	36
Relationship between some predictor variables and isokinetic knee flexor and extensor torque in young athletes.	57
Remodeling Of Thoracolumbar Orthosis In View Of 3D Analysis And Its Therapeutic Application.	139
Response of Aerobic Capacity To Treadmill Versus Bicycle Ergometer In Juvenile Rheumatoid Arthritis.	206
Role Of Aerobic Training In Symptomatic Idiopathic Dilated Cardiomyopathy Patients.	123
Role of physical therapy in patients with focal dystonia injected with botulinum toxin.	63
Role of specialized perceptual motor training program in children with chronic lead poisoning.	53
Selected immunological effects of low level laser therapy in patients with pulmonary tuberculosis.	42
Serum leptin response following weight reduction program in diabetic and non - diabetic obese women.	58
Spinal Injury Predictors for safe lifting activities.	56
Task oriented rehabilitation therapy via early program of proprioceptive training in stroke patients.	65
Tens versus air splint pressure in cerebral and spinal spasticity.	14

Title	Page
The effect of changing the frequency of bending load on bone formation after two different periods of unloading in adult Wister rats.	60
The effectiveness of flatfoot orthotics and muscle energy techniques in the management of patellofemoral dysfunction.	61
The efficacy of electrical stimulation and traditional exercise program on abdominal muscles strength after childbirth.	8
The Importance of Q-angle Measurement in the Detection of Lateral Patellofemoral Malalignment in Obese Females During Weight Bearing.	102
The role of proprioceptive training in treatment of rotator cuff impingement syndrome.	101
The role of ultrasonic therapy in controlling the hypertrophic scar.	31
The use of Electromagnetic Therapy in the Treatment of Parkinsonian Patients.	131
The use of vestibular galvanic stimulation in stroke patients.	64
Therapeutic ultrasound versus diaphragmatic breathing exercise in management of chronic obstructive pulmonary disease.	26
Three-Dimensional lumbar motion analysis in normal and low back Is function.	88
Three-Dimensional Range Of Motion Analysis Of The Upper Extremity In Normal Subjects.	76
Three-dimensional trunk motion analysis in relation to categories of low back dysfunction.	103
Transcranial magnetic stimulation for evaluation and modulation of central motor pathway in hemiparetic cerebral palsied children.	17
Transcutaneous electrical nerve stimulation versus acupressure in alleviating emesis and hyper emesis gravid arum during pregnancy.	46
Transvaginal electrical stimulation versus vaginal cones in female idiopathic detrusor instability.	7
Two-way traction Versus Cervical Manipulation in Treatment of Cervical Spine Disorders.	190
Validity and Reliability of Modified Median-to-Ulnar Sensory Nerve Action Potential Ratio Test.	177

Title	Page
Variability of Cervical Range of Motion Measurements in Normal Subjects.	117
Ventilatory functions response to respiratory exercises program in workers of tourah cement factory.	22
